

Rail Wagon Unloader

The VSS rail wagon unloader is the answer to moving difficult product from rail wagons.

High Power

Powerful NTS 50/10 pneumatic vibrator with over 8000 newtons of force to move the most stubborn material.

Low Noise

Non-impacting design has no metal-to-metal noise and means less stress on the wagon.

Easy installation

4 cups provide powerful suction to hold vibrator tightly to the wagon.

Model Vac 40 has twin vacuum generators ----- Model Vac 200/4 has an independent generator for each suction cup.

Improved Operator Safety

Unit can be permanently suspended from overhead gantry: no need for operators to lift the unit

The beam type 200/4 allows the operator to simply press one button, which starts the vacuum generators and automatically starts the vibrator after a pre-set delay.

The operator does not need to hold the unit while the vibrator is operating
